

Poker Hand Ranking

by pokermilk.com

| | |
|---|--|
|  <p>Royal Flush</p> | <p>In poker, no suit is ranked higher than another and pots are split between equally strong hands.</p> |
|  <p>Straight Flush</p> | <p>Any straight with all five cards of the same suit.</p> |
|  <p>Four of a Kind</p> | <p>Any four cards of the same rank. If two players share the same Four of a Kind, the bigger fifth card (known as the kicker) decides who wins the pot.</p> |
|  <p>Full House</p> | <p>Any three cards of the same rank together with any two cards of the same rank. Our example shows "Aces full of Kings" and it is a bigger full house than "Kings full of Aces."</p> |
|  <p>Flush</p> | <p>Any five cards of the same suit (not consecutive). The highest card of the five determines the rank of the flush. Our example shows an Ace-high flush, which is the highest possible.</p> |
|  <p>Straight</p> | <p>Any five consecutive cards of different suits. Aces can count as either a high or a low card. Our example shows a five-high straight, which is the lowest possible straight.</p> |
|  <p>Three of a Kind</p> | <p>Any three cards of the same rank. Our example shows three-of-a-kind Aces, with a King and a Queen as side cards - the best possible three of a kind.</p> |
|  <p>Two Pair</p> | <p>Any two cards of the same rank together with another two cards of the same rank. Our example shows the best possible two-pair, Aces and Kings. The highest pair of the two determines the rank of the two-pair.</p> |
|  <p>One Pair</p> | <p>Any two cards of the same rank. Our example shows the best possible one-pair hand.</p> |
|  <p>High Card</p> | <p>Any hand not in the above-mentioned hands. Our example shows the best possible high-card hand.</p> |
